⁴⁵Colby CC requires 6 credit hours

⁶Colby CC requires 6 credit hours of Natural Science and Math

Please Note:

EDUKAN consortium community colleges offer the first two years toward a bachelor's or higher degree through their AS, AA, AGS, and AAS degrees. Students may complete some or all of the college of enrollment degree requirements through EDUKAN. The Associate in Science (AS) and Associate in Arts (AA) degrees are primarily for students wishing to transfer to four-year institutions. The Associate in General Studies (AGS) is designed for students whose future educational plans are not yet clearly defined. The Associate in Applied Science (AAS) degree is designed primarily for students in two-year vocational programs, but can be utilized as a transfer degree in certain program areas.

Students pursuing the AS, AA, or AGS degrees are encouraged to contact the college of enrollment to visit with an advisor regarding the college's specific degree requirements and to also contact the transfer university as well before enrollment in any courses.

Students pursuing an AAS degree must also contact the college of enrollment to visit with an advisor about specific courses (general education and career) available via EDUKAN that will qualify in each program. DCCC students must consult with a campus advisor prior to fulfilling any of the AAS degree requirements through EDUKAN offerings as each of these programs have different general education requirements.
